Enrollment Number :EBEON0821430311

Center: Pune

Under the Guidance of,

Nisha Jaiswal mam

Technical Trainer

EduBridge

(School of coding)

Introduction:

My project is based on Online Food Service. This project mainly explains the Restaurant information and Menu. You can search various Menu of your choice and order as per your requirement. Our Project Include

Modules:-

- Admin Module
- User Module
- Menu Module
- Order Module

I have developed this Application in **Java, JSP, Hibernate, Spring Boot and MySQL**. It's a web-based projects so I have used **HTML, CSS**.

The main feature of the project is to order food online. You can access this website from anywhere and everywhere.

In Admin module, admin can add the Menu in Menu table. He can also view the total number of users at present in the website. And Menu details also. Admin can only see the admin page and Menu if he wants to order something.

In User module, user can access the website and order Menu. New user can register and login after that to order.

Software Requirements:

Front end: Java/J2EE technologies, Spring Boot, JSP, HTML, CSS.

Back end: MySQL workbench 8.0.23CE.

Middleware/Server: Apache Tomcat v8.5. IDE: SpringToolSuit4

Browser: Best result on Google Chrome

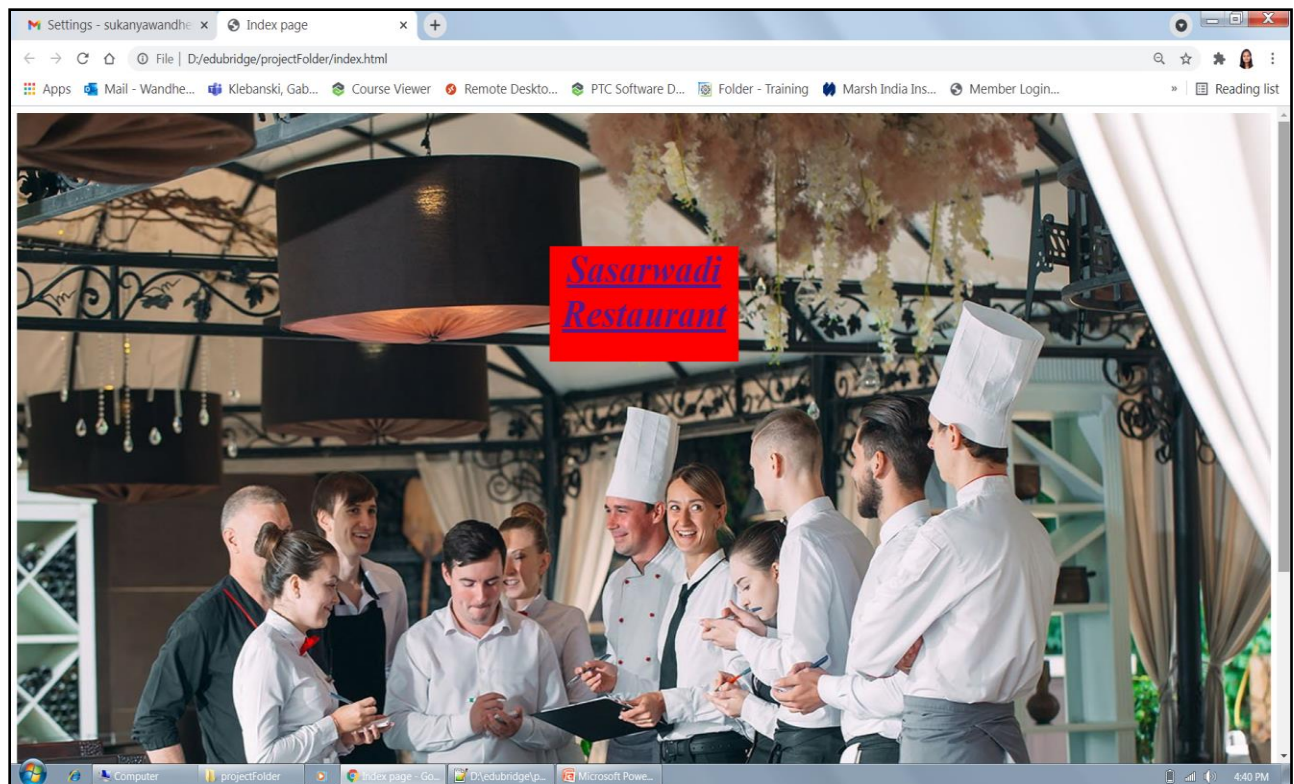

Operating System: Window 7.

Data Dictionary:

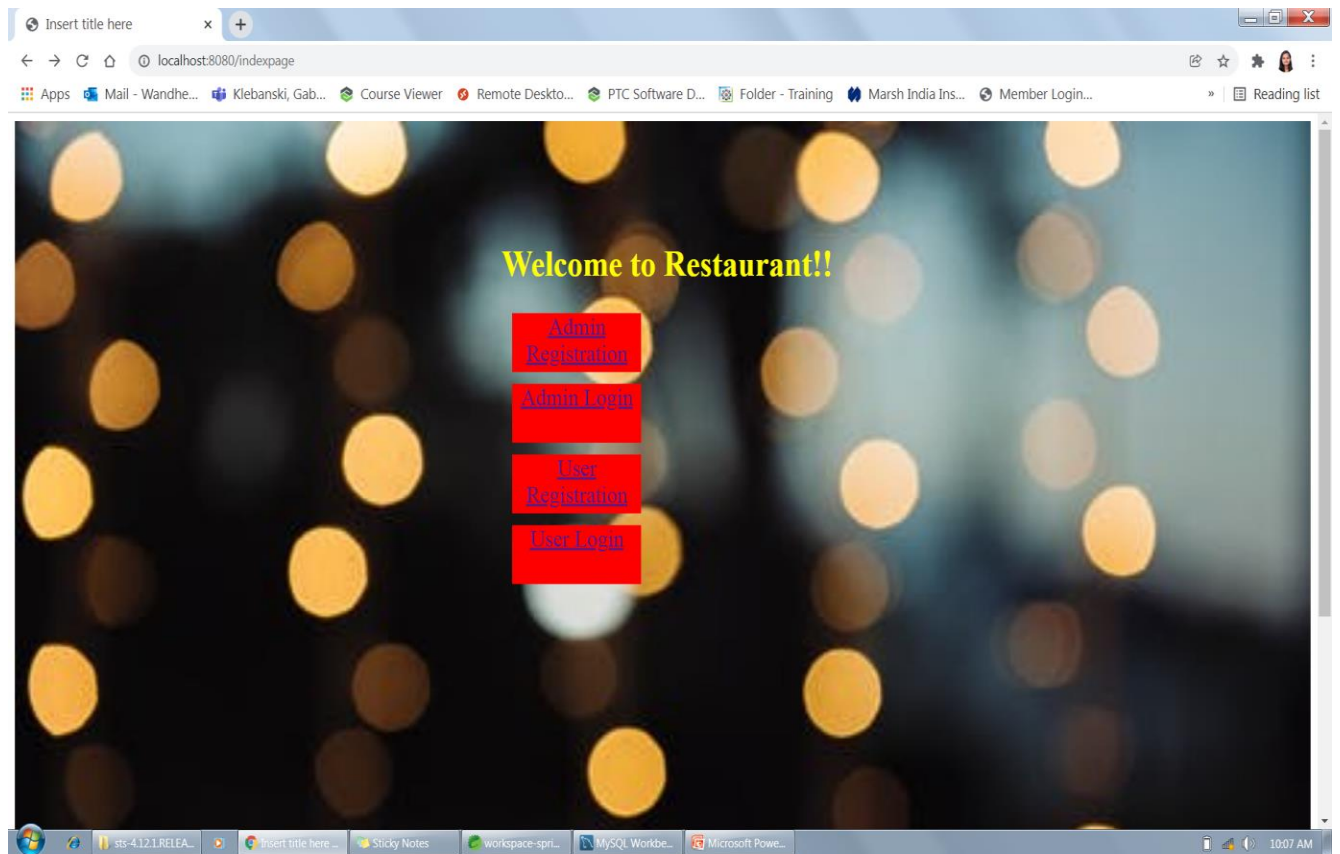

- Create Database Restaurant1;
- Hibernate: create table Admin(adid int primary key auto_increment, adname varchar(20),adpassword varchar(20));
- Hibernate: create table User(uid int primary key auto_increment, uname varchar(20),upassword varchar(20),uemail varchar(20),umobno varchar(20));
- Hibernate: create table Menu(menuid int primary key auto_increment,menuname varchar(20),menuprice varchar(20));
- Hibernate: create table order_table(orderId int primary key auto_increment,menuname varchar(20),quantity int,uname varchar(20), uemail varchar(20));
